

COMPANY INFORMATION SECURITY POLICY

1. Password Security

Employees must use strong passwords for all company accounts. Passwords must not be shared with other employees.

2. Company Devices

Employees must use organization-approved devices when accessing confidential company information.

3. Data Protection

Confidential company information must not be copied to personal cloud storage or personal devices.

4. Security Incidents

Employees must report suspected security incidents to the IT security team as soon as possible.

5. External Sharing

Confidential company documents must not be shared with external individuals or organizations without authorization from the department head.
